Message from the Guest Editors

The awareness of environmental protection is growing with the rapid development of industrialization globally. Such awareness triggers the importance of implementing sustainable manufacturing practices and a circular economy. To accomplish sustainable manufacturing and a circular economy, there need to be substantial attempts to ascertain a dynamic balance between human, financial, and environmental concerns.

This Special Issue aims to publish high-quality research papers on the interdisciplinary field of sustainable manufacturing and circular-economy-related issues. The scope of this issue can be summarized below:

- Sustainability in manufacturing enterprises;
- Green manufacturing and sustainable supply chain management;
- Circular issue in industries with respect to economic, social, and environmental aspects;
- Models and frameworks to ensure sustainable manufacturing;
- Economic, social and environmental aspects of sustainable manufacturing;
- Variables and standards to manage a sustainable ecosystem;
- Public awareness and stakeholder involvement
