Message from the Guest Editors

Dear Colleagues,

In the context of urbanization, the economy has achieved rapid development, while the extensive high-input economic development mode and serious pollution have required new manners of production and technique improvement. Meanwhile, a failure to reuse resources increases the risk of resource depletion, environmental degradation, natural disasters, social stability, and economic stagnation. On the other hand, extensive consumption and conspicuous unsustainability can lead to resource waste and environmental pollution, resulting in huge environmental losses and treatment costs. Circular economy is an effective approach to support economic development based on resource reuse, recycling, and waste reduction and can transform the traditional "resource–product–waste" mode of economic development into a "resource–product–waste–recycle–product" mode of development.

We look forward to your contributions.

Prof.Dr. Xueting Zeng

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
