closed (31 December 2021)

Message from the Guest Editors

This Special Issue (SI) focuses on cross-disciplinary research that applies climate knowledge in order to enhance its value to agricultural climate risk decision-making and support the resilience of agricultural production systems and associated socio-ecological systems (rural landscapes and communities). As such, we invite manuscripts that meet the following criteria:

1. Focus: Integrated climate services (early warning and management of extreme events, including flash droughts; past and future climate on timescales including months, seasons, years and decades; value of climate services; adaptation decision support; climate insurance; policy; extension models; novel approaches to overcoming adoption barriers) for agricultural climate risk decision-making
2. Scope: Land-based agricultural (food and fibre) production systems—global

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
