Message from the Guest Editors

The country's economic and social system is complex, influenced by other economic and social systems, their hierarchies, and the environment. One or more socio-economic factors and the indicators describing them may only partially reflect its competitiveness, so it must assess comprehensively. Thus, integrated assessment becomes a necessary qualitative characteristic of the country's competitiveness assessment process. Therefore, the competitiveness of developed and developing countries has many aspects that need to be considered when analyzing economic, social and sustainable strategic governance issues in sustainable development. That's why we invite you to contribute to this Special Issue by submitting research articles and empirical studies addressing the alignment of all kinds of competitiveness of developed and developing countries in the context of sustainability and the resulting impacts.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
