Message from the Guest Editor

Natural disasters that have been acknowledged recently as Social-Natural Disasters (indicative of the Anthropocene era) are probably the most complex problem that the global society is faced with. The causal origins and theoretical interpretations of these disasters are to be found at the interface/intersection of natural sciences with technical, social and behavioral sciences while disaster management is a matter of the appropriate interface of political science with engineering and life sciences.

The Special Issue elevates the interactive, natural and manmade causes of Social-Natural Disasters; investigates the scientific disciplines involved in specific disaster management problems; points to the disaster management failures implied by one-dimensional and single discipline strategies and measures; presents integrated approaches to disaster risk or disaster impacts; and proposes multi- and trans-disciplinary disaster management plans and programs.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
