Message from the Guest Editors

Dear Colleagues,

The Carroll Model, encompasses those economic, legal, ethical and philanthropic expectations that society has of organizations at a given moment of time, to the most current theories related to the concept of social innovation, that promote development and implementation from different spheres of new ideas to satisfy social needs and create new collaborative relationships that act as an engine of social change.

The objective of this Special Issue is to define in what way the most recent conceptual developments of CSR derive positive consequences both for the social environment. (1) based on the different meanings of CSR describe current evidence on; (2) the set of organizational and/or environmental antecedents that stimulate the effective adoption of this management strategy; (3) on its consequences at the micro, meso, and macro level in the social environment for the near future.
