Message from the Guest Editor

In the last decades, corporate sustainability has become a new corporate management paradigm. Although, this paradigm was studied and justified from a philosophical perspective, its instrumental dimension has become more relevant. From this dimension corporate sustainability considers that traditional strategic objectives related to growth and profitability are important, while companies should pursue societal goals, specifically those relating to sustainable development. Although some beneficial innovations have been developed in recent years, substantial deficiencies exist with regard to addressing planetary boundaries and broader societal goals.

The new EU Sustainable Development Strategy aims to promote a new “Green Deal” in the EU economy. This Issue aims to attract authors to present their studies related to new, innovative approaches of sustainability accounting and management tools, which may help companies to identify their key problems and to improve their contributions to the UNO goals. The issue themes include circular economy, sustainable supply chain management, planet boundaries, management and accounting tools and other topics related to UN SDG.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
