Message from the Guest Editors

Dear Colleagues,

Innovations have always been a fundamental driver of society's development. Innovation continues to be a powerful force that allows us to address many challenges that we are now facing on a global scale, especially in the context of sustainability. *Inclusive and sustainable industrialization and innovation* is the 9th of the 17 Sustainable Development Goals adopted by United Nations for 2030. Moreover, sustainable innovation is critical for reaching many if not all of these goals. This is acute in our time of accelerating climate change, the ongoing pandemic, and multiple deprivations caused by these forces globally and, especially, in the developing part of the world.
