closed (20 June 2021)

Message from the Guest Editors

The purpose of this call for papers is to foster discussion in this interdisciplinary area of the social sciences related to sustainability outcomes of the international trading system. In particular, we encourage the submission of papers that rely on empirical case studies whether quantitative or qualitative (or both) towards contributing to this discussion. What are the consequences of ignoring the underlying cultural and institutional differences across countries when engaging in and striking international trade agreements? What happens when the underlying differences across countries, their consumer and producer cultures, and economic systems purposefully become the object of arbitrage itself with outset in the principle of comparative advantage? Should we encourage public standards? Or how can current efforts in the private (self and soft governance) and public (hard and soft governance) spheres help to improve standards such as environmental standards? What other potential roles can the private and public spheres assume individually or in collaboration towards fostering a more sustainable trading system?

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
