Message from the Guest Editors

Culture is regarded as one of four pillars of sustainable development. In this context three main functions of culture are considered. In the first one, which can be called “culture **in** sustainable development” it plays the supporting and self-regulating role in the environment it co-creates. Within its second function, as “culture **for** sustainable development” is responsible for initiating various processes in its environment and creating the future. Finally, the third function, “culture **as** sustainable development”, is where culture constitutes the foundation of sustainable development. In this context in this Special Issue we would like to ask a question how to manage culture in order to strengthen its role in sustainable development. We intend to focus on a conceptual as well as practical perspective on cultural management and to show what kind of implications sustainable development has on this field. We are also interested: How culture management may contribute to sustainable development. We are open to research papers of empirical and conceptual nature. We also invite scholars to share case studies to submit their papers.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
