Message from the Guest Editors

Dear Colleagues,

The Special Issue of *Sustainability* aims to gather the latest innovations regarding sustainable indicators for stakeholders. Today, in addition to environmental impact studies, environmental impact assessments can be conducted with a life-cycle assessment approach—a well-known and standardized method. However, many limitations have been identified (e.g., non-consideration of the temporal parameters) and can limit the understanding of the indicator by the stakeholders.

For this reason, we are developing this Special Issue showing the improvements of indicators contributing to help stakeholders to reduce environmental impacts. This Special Issue will cover traditional life-cycle impact assessment as well as highlight complementary indicators such as economical (e.g., circular economy) indicators, mechanical (e.g., dismantling) indicators, and so on.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
