Message from the Guest Editors

Dear Colleagues,

The increasing volume of learning-related data and high-performance computing are enabling intelligent systems that can support sustainable education with a very wide range of advantages, providing learners with personalized guidance. As artificial intelligence research and development is becoming more mature and the corresponding outputs are being deployed at scale in real-world contexts, the crucial role of using personalized and automated systems in sustainable education is becoming more evident. Current research has greatly expanded our understanding of such artificial intelligence techniques and applications in the area of education. However, more research is required and many questions remain to be answered to bridge technological, social, pedagogical, and ethical perspectives of these intelligent systems.

This Special Issue aims to present research results reporting the current state-of-the-art of online education systems empowered with artificial intelligence, examining the elements of personalized e-learning, technology, applications, sustainable development, and teaching and learning principles that contribute toward a sustainable education.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
