

## Product Eco-Design in the Era of Circular Economy

Guest Editors:

**Prof. Claudio Favi**

Department of Engineering and Architecture, Parma University, 43124 Parma, Italy

**Prof. Dr. Marco Marconi**

Department of Economics, Engineering, Society and Business Organization, Tuscia University, 01100 Viterbo, Italy

Deadline for manuscript submissions:

**closed (29 February 2024)**

### Message from the Guest Editors

The design and development of products for daily use is changing due to the new constraints derived by the paradigms of sustainability and circular economy. Designers and engineers are called to rethink the way products are conceived, anticipating life cycle and end of life issues in the early phase of design where the degree of freedom to change the product features are higher and the impacts most effective.

Environmental performance has become an important aspect of design together with the other classical design drivers, such as quality, safety, functionality and ergonomics. Eco-design methodologies need to be effective in daily engineering practices, enhancing circular business models by means of product life cycle extension and effective management of closed-loop, end-of-life strategies.

Papers exploring novel eco-design methodologies, and strongly oriented to circular economy and life cycle engineering, are invited. Case studies focusing on the new paradigm of circular economy or its measurement by means of circular indicators are also welcome.

an Open Access Journal by MDPI

## Editor-in-Chief

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
