Message from the Collection Editors

Sustainable development goals (SDGs) as the new global framework aim to suppress poverty and obtain worldwide sustainable development by 2030, with no one left behind. This Special Issue is dedicated to these SDGs, proposing an inclusive approach that addresses the core dimension of sustainable development: humankind, with emphasis on, among other things: human dignity; regional and global stability; a sustainable and healthy planet; fair and resilient societies; prosperous economies.

The UN 2030 Agenda and the EU-27 Agenda acknowledge that poverty alleviation, economic growth and sustainability, and greening economies and societies need wide and comprehensive plans that approach both economic and social needs by taking into account the climate emergencies. Education, health, social protection, new green and sustainable jobs, resilience, and environment protection require multiple integrated and holistic approaches dealing with economic and social policies and institutions. This Special Issue invites papers dedicated to these multiple and relevant facets of sustainable and resilient development at the global and European level.
