Message from the Guest Editors

Economic sustainability refers to the economic practice that aims to achieve long-term economic growth without creating negative externalities. Globalization, which has played central role in the development of the world's economic growth via the free movement of goods, services, technologies, capitals, and labor, faces many challenges. This Special Issue invites submissions of comprehensive reviews or research articles, and commentaries that promote the "Economic Sustainability of the Economy". As communities, nations and regional partners make choices to work towards a more sustainable world, we wish to collate the opinions of researchers from all disciplines, and at all levels in their chosen fields, to present their ideas for new approaches to the economic sustainability. The best contributions will be selected for inclusion in this Special Issue. Dedicated researchers in the field of economics, in addition to experienced scientists, are most welcome to submit research to this Special Issue.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
