### Message from the Guest Editor

This Special Issue intends to discuss these two types of contributions together. On the one hand, the economic development strategies that have emerged in recent decades, supported by micro-initiative, micro-entrepreneurship, small and medium-sized enterprises, and Social Economy initiatives, are welcome here; however, we also expect the focus to be on the many challenges and emerging opportunities that COVID-19 has brought to all economies together and to each economy individually, as well as to each economic agent or each group of agents (be they producers, consumers, taxpayers, states, non-profit organizations, etc.). We are seeking theoretical, empirical, and critical contributions.
