Message from the Guest Editors

The transition to the circular economy (CE) is an emerging global phenomenon in the sustainability context. The CE is defined as an economic system in which “the value of products and materials is maintained for as long as possible; waste and resource use are minimized, and resources are kept within the economy when a product has reached the end of its life, to be used again and again to create further value” (European Commission). The CE is linked with a paradigm shift in modern societies from old linear production systems and consumption towards sustainable, ideally zero-waste production and consumption processes. The success of the CE will rely on innovation in traditional sectors as well as new business models. User acceptance as well as appropriate quality infrastructure including standards, certification, and regulation to provide an appropriate playing field for all stakeholders are important pillars of the new paradigm. Based on a clearly articulated demand in the research community, we call for papers for this Special Issue on the circular economy, innovation, and quality infrastructure.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
