Message from the Guest Editor

Energy transition towards carbon neutrality has gained more urgency in the actual global context, where industries are still heavily relying on fossil fuels, many countries are still relying on imported energy and fuels, urbanized, densely populated areas are still rapidly expanding, and citizens have become more aware of their individual and collective roles in ensuring a sustainable future. The transition process remains a very complex on-going process, with various levels of interactions among stakeholders such as, e.g., industries, policy makers, researchers, citizens, etc. Despite the fact that in the long-term, all stakeholders aim to achieve sustainability and carbon neutrality, more interactions among them are still needed to support and enhance the energy transition towards carbon neutrality.

This Special Issue focuses on how and where carbon emission reduction and the increased use of renewables in the strategies and activities of various stakeholders can support each other to achieve carbon neutrality.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
