### Message from the Guest Editors

Although the previous literature has advanced our knowledge and understanding of the important roles of sustainable entrepreneurship and sustainable innovation, a number of studies suggest the need for further work in this area (see for example, Anand et al., 2021; Haldar, 2019). Therefore, this call for papers aims to provide more knowledge and understanding about sustainable entrepreneurship and sustainable innovation both in developed and developing economies. Specifically, we call for papers that provide help in understanding the foundations, processes and outcomes of adopting sustainable entrepreneurship, innovation approaches and management practices in both small and large-sized organisations, along with how this affects the well-being and economic prosperity of a society in the short-run and in the long-run.
