### Message from the Guest Editor

The United Nations' 2021 Climate Change report comprehensively described the negative effects of human activity on our globe, and outlined the steps necessary to respond (IPCC, 2021). While supply chain management is essential to improving economies and quality of life, it also drives much of the human activity causing these negative effects. Recognizing the importance of this issue, environmental sustainability has become a strategic goal for supply chain managers and organizations, and a differentiator for competitive market advantage.

This special issue call for papers welcomes interdisciplinary, research-based scholarly contributions that advocate for the integration of modern environmentally sustainable principles and methods to supply chain management strategies and practices, to advance theory and practice in this critical focus area. Integrating environmentally, sustainable, and financially balanced practices across the entire supply chain management system offers valuable contributions and advances, since the system crosses geographical boundaries, academic disciplines, and ideologies. Innovation emerges from such diversity.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
