Deadline for manuscript  
submissions:

**closed (30 November 2021)**

### Message from the Guest Editor

Environmental hazards such as earthquakes, tsunamis, and volcanic eruptions represent a significant risk to communities living under such threats. Having a better understanding, among others, of the physics of these events, monitoring, risk assessment and prediction, preparedness (public awareness), and disaster management systems, may help to mitigate the impact of disasters.

The aim of this Special issue is to create a forum for discussion on these issues from a multidisciplinary point of view. It is hoped that this interchange of experiences, approaches, and new ideas will help to advance to the challenge of reducing disaster risk. Effectively, achieving this will make vulnerable communities' development sustainable.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
