Message from the Guest Editors

In the last few years, climate change and resource consumption have become a main global issue and are among the most challenging communication issues for marketers in the private and public sector.

Ecolabels, together with environmental management systems (EMS), have been proven to be the most effective in reducing companies' negative impact on the environment and to communicate companies' efforts toward sustainability (Marrucci et al., 2021).

In this sense, the academic literature is struggling to keep up in photographing and analyzing changes in companies' behavior about these tools and their role in the transition towards a more climate-neutral circular economy. Moreover, the impact of environmental management and labels on consumers awareness and specific purchasing decisions is mixed, and evidence on consumer behavior is often inconclusive.

Through this Special Issue, we aim at collecting studies, both qualitative and quantitative, as well as best practices and experience descriptions which focus on the use of environmental management and ecolabels to achieve a climate-neutral circular economy, considering all its aspects.

an Open Access Journal by MDPI

Editor-in-Chief

Faculty of Engineering and
Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
