Message from the Guest Editors

Dear Colleagues,

As the guest editors of the special issue of Sustainability (impact factor 2018:2,592; ISSN 2071-1050), "In Quest for Environmental Sustainability: Microorganisms to the Rescue" I would like to ask for your contribution. This Special Issue focuses on the role of microorganisms in providing new clean solutions for achieving Environmental Sustainability. We welcome the following article types: original articles, critical reviews, mini-reviews, opinions, research notes, and short communications. In this issue, we aim to provide a snapshot of microbial biodiversity, bioremediation processes, degradation of pollutants, degradation and removal of contaminants as well as crop protection. We also welcome research and review articles on Actinobacteria not only as antibiotics producers, but also as promoters of crop protection and agents for the treatment of pollutants and wastes.

Very best regards,
Dr. E. Giannoutsou
