Message from the Guest Editor

This Special Issue focuses on three factors—environmental sustainability, urban planning, quality of urban life and the processes amongst them. We consider the concepts of environmental sustainability and quality of urban life together with urban planning as a set of urban–technical–economic–social processes as key drivers of the current development of cities. We warmly welcome papers aimed at conceptualising, analysing, and measuring two or all of these factors. We also warmly welcome papers focusing on the relationships between two of these factors or the relationships of all three. We are looking forward to theoretical papers and application-oriented papers on environmental sustainability in urban planning, the impact of environmental sustainability on the quality of life and on measuring the quality of urban life as an expression of residents' satisfaction with city life. We are open to research in terms of our focus on border issues such as environmental justice, urbanisation, deurbanisation, urban sprawl, urban liveability, quality of urban life in cities of different size categories or quality of urban life in socially excluded parts of cities.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
