Deadline for manuscript submissions:
closed (31 December 2021)

Message from the Guest Editors

Dear Colleagues,

Sustainable event management is to design and manage an event economically, socially, culturally, and environmentally responsible by making efficient decisions in the planning, organization, and execution of an event. Sustainability should be practiced in all levels of event management to ensure that an event is hosted responsibly and leaves positive legacies that benefit local communities. Sustainable event management can be achieved by analyzing the needs and values of diverse stakeholders that are directly or indirectly impacted by the event. The focused area of sustainable event management has not drawn much attention among scholars, although it has never been enough merely to stress on the importance of the sustainability in event management. The guest editor would like to take this opportunity to bring significant attention among event management scholars and practitioners of sustainability in event management by proposing this Special Issue. I would like to cordially invite scholars to contribute an article to the Special Issue titled "Sustainable Event Management."

Special Issue

Editor-in-Chief

Prof. Dr. Marc A. Rosen
Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
