Message from the Collection Editor

Dear Colleagues,

In the last few years, the sustainability of the food system requires a thorough understanding of the relationships between food consumption behaviors, processing and distribution activities, and agricultural production practices. This Special Issue aims to study consumer attitudes and preferences towards food products and the health and sustainability of the food system. Understanding of these determinants in relation to sustainable foods and eating patterns is instrumental for marketers, product developers and those working in public health to increase the uptake of sustainable foods and sustainable eating patterns by a significant part of consumers.

The studies of this Special Issue are expected to address:

- sustainable food systems
- sustainable food consumption
- consumer attitudes
- food choice behaviors
- sustainable utilization and management of food waste

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
