

The Challenge of Food Waste Reduction to Achieve More Sustainable Food Systems

Guest Editors:

Dr. Clara Cicatiello

Department for Innovation in Biological, Agro-Food and Forest Systems (DIBAF), University of Tuscia, Viterbo, Italy

Dr. Mattias Eriksson

Department of Energy and Technology, Swedish University of Agricultural Sciences, Uppsala, Sweden

Deadline for manuscript submissions:

closed (30 September 2020)

Message from the Guest Editors

This Special Issue seeks to push the research on the strategies that may be implemented at any stage of the supply chain to reduce the amount of food waste generated. Articles shall focus on food waste prevention strategies and actions, but studies dealing with a sustainable management of food waste, in line with the food waste hierarchy, may also be considered. Assessments about the effectiveness of technological, organizational or managerial innovations seeking food waste reduction are also welcome. The purpose of the Special Issue is to collect evidence about what managers of food companies, policy makers, and consumers can do to contribute to facing the challenge of food waste reduction, thus supporting the development of more sustainable food systems.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
