Message from the Guest Editors

Dear Colleagues,

In a resource-constrained ecosystem, not only emerging but also developed markets face an uphill of challenge to innovate. Frugal innovation refers to the process of economizing the usage of scarce resources by reducing product costs, which results in not only building technologically advanced solutions, but also enabling solution integration for emerging markets. These solutions have proven to be effective, socially valuable, economical, profitable, and in some cases, their business models have disrupted the existing markets. Albert (2019) in his study associates frugal innovation specifically with ecological and social sustainability, recommending the use of the term “ecologically sustainable frugal innovation” for frugal innovation with a positive connection to ecological sustainability. Meanwhile, Von Janda et al. (2020) further extend the concept by defining frugal innovation as a four-dimensional put-up of cost of consumption, sustainability, simplicity, and basic quality.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
