Deadline for manuscript  
submissions:

**closed (31 January 2023)**

### Message from the Guest Editors

Dear Colleagues,

Ecological studies have recently moved from being centered in species identities and pairwise interactions, towards focusing on organisms' functional traits and behavior. Functional traits are well-defined, measurable properties of organisms that strongly influence organismal performance, and therefore define how such organisms interact with their surrounding biophysical environment. Understanding macroecological processes via mechanistic models of functional diversity has revealed itself as crucial for understanding not only community dynamics but also ecosystem processes and functionality.

We encourage authors to submit papers based on terrestrial and marine ecosystems, and considering functional traits of the plant and animal kingdoms. You are invited to submit an original article or communication based on your research in this area, or possibly a focused review paper on some aspect of the subject.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
