Message from the Guest Editors

Dear Colleagues,

Sustainability is based on the awareness that the natural resources of the Earth system are limited, that ecosystem services can be extremely delicate, and that their management by human communities must take into account planetary limits, so as to develop a safe operating space. This Special Issue aims to enrich and broaden the discussion on the concept of sustainability, analyzing it also in the light of the values of geoethics and considering its ethical, social, and cultural implications, so as to enrich the theoretical perspectives and practical applications of a global ethics towards the Earth. To this end, authors are invited to submit papers with scientific considerations, but also reflections relating to philosophical, historical, sociological, economic, and technological aspects, also with the help of practical examples and case studies. The Special Issue is promoted by the IAPG—International Association for Promoting Geoethics (<http://www.geoethics.org>).

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
