submissions:

**closed (30 August 2023)**

### Message from the Guest Editors

Dear Colleagues,

Plant biodiversity has become an important issue on a global level for food, nutritional security and environmental stewardship. Biodiversity is increasingly becoming recognized as a vital issue at local, national and international levels, and there is a continued effort to find practical and workable strategies to contest genetic erosion and enhance biological diversity. Technological advances in plant biology and agriculture are now integrated to offer solutions to enhance, maintain and exploit plant biodiversity. The vastness of the plant kingdom, with almost 20,000 edible plant species, allows for a broad research scope regarding the discovery of new food crops, medicinal plants, environmentally protective plants and industrially relevant plants.

We look forward to receiving your contributions.

Prof. Penna Suprasanna

Prof. Shri Mohan Jain

Prof. Sudhir K. Sopory

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
