Message from the Guest Editors

Dear Colleagues,

The green deal strategies and the circular economy (CE) models indicate the most important directions of changes in all economic processes in the world. The green deal strategies aim to reduce climate change and/or to achieve climate neutrality, while CE models focus on resource efficiency (rational management of resources and wastes) and building of competitive economy. Implementation of the green deal strategies and the CE models is crucial in the pursuit of sustainability, in which environmental, economic, and social aspects are integrated to ensure the survival of present and future generations. Therefore, the purpose of this Special Issue is to present examples of innovative solutions (technological, environmental, economic, and social) that should be introduced in various industries and areas of economy, such as production and consumption, large-scale infrastructure, transport, water, food and agriculture, construction, taxation or social activities.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
