

## Green Engineering, Green Chemistry and Circular Economy: Principles, Research Areas and Challenges. Towards a Holistic View of Sustainability

Guest Editors:

**Dr. Luca Silvestri**

**Dr. Cecilia Silvestri**

**Dr. Antonio Forcina**

**Dr. Gianpaolo Di Bona**

Deadline for manuscript  
submissions:

**closed (30 September 2024)**

### Message from the Guest Editors

The US Environmental Protection Agency defines “Green Engineering” as “the design, commercialization and use of processes and products that are technically and economically feasible while minimizing (1) generation of pollution at the source (2) risk to human health and the environment”. Both Green Chemistry and Green Engineering “help to balance the need quality of life improvement, while maintaining the health of humans and the environment”. In this regard, sustainability goes beyond Green Chemistry and Green Engineering concepts. Sustainability and sustainable development are ethical theories that define desirable results in a context that considers environmental, economic, and social aspects.

This SI aims to stimulate a debate on these concepts, supporting a creative and valuable discussion between leading international researchers and experts on these four reference topics: 1) green chemistry, 2) sustainable chemistry; 3) green engineering, and 4) sustainability/sustainable development/circular economy.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
