Message from the Guest Editor

Dear Colleagues,

The sudden onset of the COVID-19 pandemic has made humanity aware that coordinated, rapid responses are needed in times of crisis. In addition, new modes of thinking can be spawned to ensure our success and survival. Worsening climate change, untenable environmental pollution and destruction of biodiversity likewise have the potential to not only disrupt our lives but put them in peril. All around the world, Green Engineering solutions are being conceived, researched, developed and put into action. In this Special Issue, we solicit manuscripts in the areas of fabrication of composite materials derived from wastes. We also seek contributions where soaps and/or biofuels are made from environmentally friendly or waste sources. Papers that address Green Engineering solutions of problems endemic in developing societies are welcomed.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
