Message from the Guest Editor

At present, with the rise in environmental problems around the world, such as global warming and drought, interest in green technologies has increased. Energy is the most important issue of the green technologies. Conventional sources of energy are running out rapidly, and this is one of the main concerns of all governments that need to find, utilize, and provide other sources of energy. Renewable energy is one type of energy source which does not pollute the environment and can also be reproduced. The concern of this Special Issue is to identify new research, innovations, and activities on green technology and renewable energy projects. Research on the impact of green technology and renewable energy, on societies, viability, as well as economic analysis compared to conventional technologies and energy are welcomed. Further, the Special Issue welcomes research on the effect of green technology and renewable energy at different parts of the world and the relation of some advanced technologies such as nanotech, biotech, and so on with green technology and renewable energy, and how effective they can be in solving the problems of the world in the new era.

an Open Access Journal by MDPI

Editor-in-Chief

Faculty of Engineering and
Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
