Institute of Plant Breeding and Genetic Resources, Hellenic Agricultural Organization-Dimitra, 57001 Thessaloniki, Greece

Dr. Dennis Dannehl

Division Biosystems Engineering, Albrecht Daniel Thaer Institute of Agricultural and Horticultural Sciences, Faculty of Life Sciences, Humboldt-Universität zu Berlin, 14195 Berlin, Germany

Deadline for manuscript submissions:

closed (30 September 2023)

Message from the Guest Editors

Food production and consumption has a significant environmental impact and the current consensus is that we must move towards more sustainable practices. In this context, greenhouse gas emissions associated with greenhouse production strategies is a central issue in many countries.

The increase of resource use efficiency (IRUE) in terms of energy, water, nutrients and growing media use provides strategies to maximize production while taking measures against climate change. Renewable Energy Sources (RES) fit in this context, proving to be a useful tool for sustainable greenhouses. Currently, the knowledge concerning utilization of sustainable greenhouse production strategies and product carbon footprint is increasing. Still, many key points must be studied in depth regarding the sustainable use and reuse of energy, water, nutrients and growing media under different greenhouse types and locations around the world.

Based on these challenges, this Special Issue is welcoming papers, that provide insight into all topics related to sustainable greenhouse. Some perspectives on economic sustainability are also encouraged.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
