Message from the Guest Editors

Climate warming is causing changes in water resources across different regions of the world. Water resources are important to both society and ecosystems, in areas such as agriculture, energy production, navigation, recreation, and manufacturing. Many of these uses put pressure on water resources, pressure likely to be exacerbated by climate change and human activities. Moreover, these factors have had a significant impact on water resources, changing the spatial and temporal distribution of water resources and the water environment.

This Special Issue seeks research papers related to the impacts of climate change on water resources and the environment, including environmental hydrology, hydrogeology, water resources, climate change, flood, drought, statistical hydrology, and coastal aquifers. It is with great pleasure that I invite you to contribute to the better understanding of environmental hydrology and water resources by participating in the Special Issue “Advances in Sustainable and Environmental Hydrology, Hydrogeology and Water Resources” of the journal *Sustainability*, published by MDPI.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
