Message from the Guest Editors

Dear Colleagues,

Climate change is one of the most (or maybe the most) important threats facing humankind. The challenge of sustainability lies in human hands by minimizing environmental impact or benefitting the environment through human behavior. Thus, pro-environmental behavior is increasingly becoming a vital factor in psychology. The focus of this Special Issue is the specification of determinants that are positively related to pro-environmental behavior on the one hand, and, on the other hand, characteristics that hinder people from behaving pro-environmentally. Future interventions could build on these findings to promote pro-environmental behavior.

In conclusion, we call for articles that investigate (positive and negative) determinants of pro-environmental behavior for this Special Issue in Sustainability. Inter- or transdisciplinary approaches are welcome, as long as these contribute to the psychological research question.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
