Message from the Guest Editors

Dear Colleagues,

With technological competition between countries intensifying in recent years, technology trade and protection have also become increasingly important. The issue of technology theft, previously considered a problem between companies, has now grown to become a point of contention between countries, through acts of industrial espionage. In addition, technology theft through the loss of core personnel overseas weakens a country's industrial competitiveness in terms of global competition, and is fast becoming a serious threat to the economic security of nations.

Industrial security is an especially important issue, not only for maintaining the competitiveness of a company, but also for continuing the sustainable industrial development of the country. Despite increasing social interest regarding recent technology disputes and the active discussions between advanced countries on a technology protection policy, the reality is that there is a severe lack of academic discussion and research related to this topic.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
