Message from the Guest Editors

Dear Colleagues,

Globalization and the growth of outsourcing have prompted supply chain (SC) networks to become more complex and unpredictable, since SC partners have higher autonomy, and they often belong to different SCs concurrently. In this context, information sharing plays a key role for improving SC coordination, which would be the catalyst for accommodating the added complexity of current SC networks and improving SC performance.

In this Special Issue, we aim to bring together original and high-quality papers fitting the Special Issue's theme. Papers must demonstrate substantial new contributions, and authors need to explicitly indicate scientific advances as compared to prior research studies. Both technical and survey/review papers are welcomed.

- supply-chain resilience
- information sharing
- partial/erroneous information sharing
- simulation in complex supply-chains
- risk management in supply chains
- reverse logistics

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
