Message from the Guest Editor

Sustainability has become a crucial issue for entrepreneurial developments worldwide. The need for innovation is often driven by the increasing need for agility in business and institutional structures, and this, in turn, is driven by the increasing speed of change in market trends. This is where Sustainable Development Goals (SDGs) play a fundamental role. This Special Issue intends to cover new approaches, techniques, and practices leading to significant advances in these and related areas. All of them consider different typologies of sustainable entrepreneurship that meet societal goals to innovate in different market contexts. The papers selected for this Special Issue will undergo a rigorous peer review process with the aim of disseminating research results, progress and applications quickly and widely.
