Deadline for manuscript
submissions:

closed (28 February 2021)

Message from the Guest Editors

Integral approaches attempt to make sense of any topic from as many perspectives as possible, with the attitude that each is correct but partial. Integral Sustainable Design is a powerful and transformative framework that helps organize thinking, research, and design to achieve high levels of performance, ecologically integrated solutions, culturally connected initiatives, and green design aesthetics. This special issue features articles that define broad approaches to research using multiple perspectives with clear methods. These may include the use of Integral Sustainable Design, Integral Theory or other mixed methods and multi-perspective approaches. Articles selected for this special issue will be peer-reviewed with the aim of encouraging a broad level of open and diverse thinking, thereby fostering a deep level of authentic transdisciplinary research and design.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
