Message from the Guest Editor

Dear Colleague,

This Special Issue of *Sustainability* is inviting original research and review articles that focus on identifying biorefinery integration problems and proposing techniques involved in thermochemical, biochemical and innovative sustainable approaches for the production of a range of bio-based products through maximizing biomass utilization while minimizing waste. Topics of interest include but are not limited to the following:

- Key factors influencing the cost of medium to large scale biorefinery plants
- Environmental aspects of biorefinery plants
- Innovative approaches in biorefinery process optimization
- Sustainable strategies in biomass production and biorefinery process integration
- Resource conservation and waste management
- Environmental impact assessment of biorefinery products

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
