Message from the Guest Editors

The objective of the Special Issue is—by analyzing the social, economic, and environmental outcomes and tradeoffs of policy choices in an integrated way—to break the sustainability deadlock, which is caused by the belief that economic growth and environmental sustainability are conflicting goals. By identifying potential winners and losers, policies need to be designed to maximize positive social, economic, and environmental outcomes while protecting and offering solutions to countries, industries, companies, workers, and communities which may be negatively impacted by the restructuring. It will thereby contribute to ensuring that the transition to a green economy is not only environmentally sound and economically viable, but also socially acceptable. We welcome qualitative and quantitative analysis that takes a holistic perspective covering all dimensions of sustainable development.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
