Message from the Guest Editors

The goal of this Special Issue is to explore how state-of-the-art research and practice in life cycle thinking of the built environment is developing, along with improvements in building construction. Research related to the new construction and renovation of existing buildings, that takes into account a holistic, life cycle approach and several SDGs, is of interest. New construction, whole buildings and building elements, fossil fuel free and zero waste construction, are among the topics for this Special Issue. Case studies, comments, reviews and method papers, not only limited to LCA, but also social LCA and life costing, eventually integrated, or not, into a life cycle sustainability assessment (Finkbeiner, et al. 2010), are welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
