

Product Lifecycle Management Applications and Innovation for Sustainability

Guest Editor:

Prof. Dr. Carlos Vila

Department of Mechanical and
Materials Engineering,
Polytechnic University of
Valencia, Valencia, Spain

Deadline for manuscript
submissions:

closed (15 February 2021)

Message from the Guest Editor

The global consciousness about our environmental future has led international organizations and countries to encourage safeguarding actions through laws, directives, and initiatives. Sustainable industrial development has been one of the main concerning issues for manufacturing companies to address the problem of natural resource limitations and pollution. A green product lifecycle management vision could help future generations, and innovative contributions are welcome.

Therefore, this Special Issue is to publish the latest fine works in research, development, and innovation in different product lifecycle management phases. We are very interested in contributions that investigate the improvement of product and process sustainability and that can be focused in one activity or in transversal procedures.

Moreover, we encourage the submission of papers that can help to put together all the key knowledge in sustainable product lifecycle management strategies.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
