Message from the Guest Editors

Dear Colleagues,

We invite you to submit original research papers to a Special Issue on the topic of "Local Water Security for Health". This Special Issue will focus on the social, economic, cultural, governance, structural, and environmental dimensions of local water security, their links to each other, and to human health and wellbeing. This Issue seeks to advance the dialogue around water (in)security in small communities around the world, through the explicit recognition of the links between the societal and physical systems, human health, and the tools that enhance our ability to capture these complexities towards building resilient, water-secure, healthy communities. We particularly welcome papers focused on marginalized populations.
