Message from the Guest Editor

A health management service, mobile health, is becoming a reality in the context of mobile technology. However, it raises privacy concerns, and makes the analysis a black box. In order to solve these technical and social problems, this Special Issue will include but is not limited to:

- Conceptual propositions on technology and innovation for sustainability and social implementation of mHealth and Healthcare AI;
- Systematic reviews on technology and innovation for sustainability and social implementation of mHealth and Healthcare AI;
- Methodology for the analysis, design, and implementation of innovative technology, products/services, and systems for sustainability and social implementation of mHealth and Healthcare AI;
- Practices and case studies on technology and innovation management for sustainability and social implementation of mHealth and Healthcare AI.

We expect that this Special Issue will serve as a forum for anyone with an interest in and passion toward the realization of a sustainable society through technology and innovation.

Special Issue

Editor-in-Chief

Prof. Dr. Steve W. Lyon
School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
