Message from the Guest Editors

Dear Colleagues,

The sustainable development agenda, established in 2015, is a set of global objectives for 2030, known as Sustainable Development Goals (SDGs), to transform the world by protecting the planet, eradicating povertyand ensuring worldwide prosperity. In this context, both stakeholders (governments, public sector, private sector, end-users, etc.) and technology play a key role in improving the quality of life and responding to society's socio-economic development challenges. The integration of sustainability in the governance and management of technology projects is a means to achieve these goals. Sustainability can be applied throughout the project life cycle, from ideation to delivery of the final product.

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. Sustainability publishes original research articles, review articles and communications, I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
