

## Sustainable and Agile Manufacturing in the Era of Industry 4.0: Application of Simulation, Optimization, Lean, and Emerging Digital Technologies

Guest Editor:

**Assoc. Prof. Dr. Masood Fathi**

Department of Production & Automation Engineering, School of Engineering Science, University of Skövde, P.O.Box 408, SE-541 28, Skövde, Sweden

Deadline for manuscript submissions:

**closed (31 December 2021)**

### Message from the Guest Editor

In the Industry 4.0 era, the manufacturing industry is continuously challenged by the market to improve product quality, increase production efficiency, ensure safety, and enhance sustainability while maintaining agility in manufacturing products and satisfying customer demand. Digital technologies such as smart wearables, or augmented/virtual/mixed reality are undoubtedly the driving force behind manufacturing agility through making the right information accessible at the right time. Moreover, informed decision making as well as smart production planning and scheduling drive manufacturing agility in the Industry 4.0 context. An intelligent production planning, scheduling, and control system have an incredibly important role in collecting, processing, and inferring the industrial data for making informed and right decisions instantaneously. The efficient, flexible, and reliable logistics system is also an indispensable part of sustainable and agile manufacturing.

The main aim of this Special Issue is to publish a collection of high-quality research papers on sustainable and agile manufacturing, including both review and original research articles.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
